

## ABSTRACT OF THE DISCLOSURE

[0038] Methods, systems, and products are disclosed for providing communications services. One method receives a request for communications service. The request for communications service originates from a client communications device associated with a user and requests communications service from a service provider. An availability of at least one of i) a communications network operated by the service provider and ii) another communications network operated by another service provider is dynamically assessed in real-time. A best-value scenario of segmentation, dispersion, assemblage, and routing of electronic data is assessed to fulfill the request. The best-value scenario maximizes profitability for the service provider. The communications service is provided to fulfill the request according to the best-value scenario.
